How to print a 3D model file?

- Export the 3D Model   (.obj or .stl file format)
- Load it into the Slicer software   (Cura)
- Position the model   (Rotate > lay flat)
- Choose your printer   (Ultimaker 2 or Type A Machines 1 2013)
- Choose filament material   (PLA)
- Choose optional settings   (Recommended default)
- Save to SD card   (.gcode)
- Insert the SD card in the 3D printer
- Start the job on the printer
